**Beyond
moulding**

straight to
the **future**

The **future belongs**
to those who have the
courage to **be different**

Step by step

Since 1959, plastics have played a leading role at NTS. Over time, we have adapted to market changes and challenges, aiming to build **innovative solutions** for the future.

With **65 years of experience** behind us, **20,000 square meters of facilities**, **240 employees** and **EUR 900,000 of investment per year**, we have built an efficient and functional business model.

Our values guide our daily work, focusing on **people**.

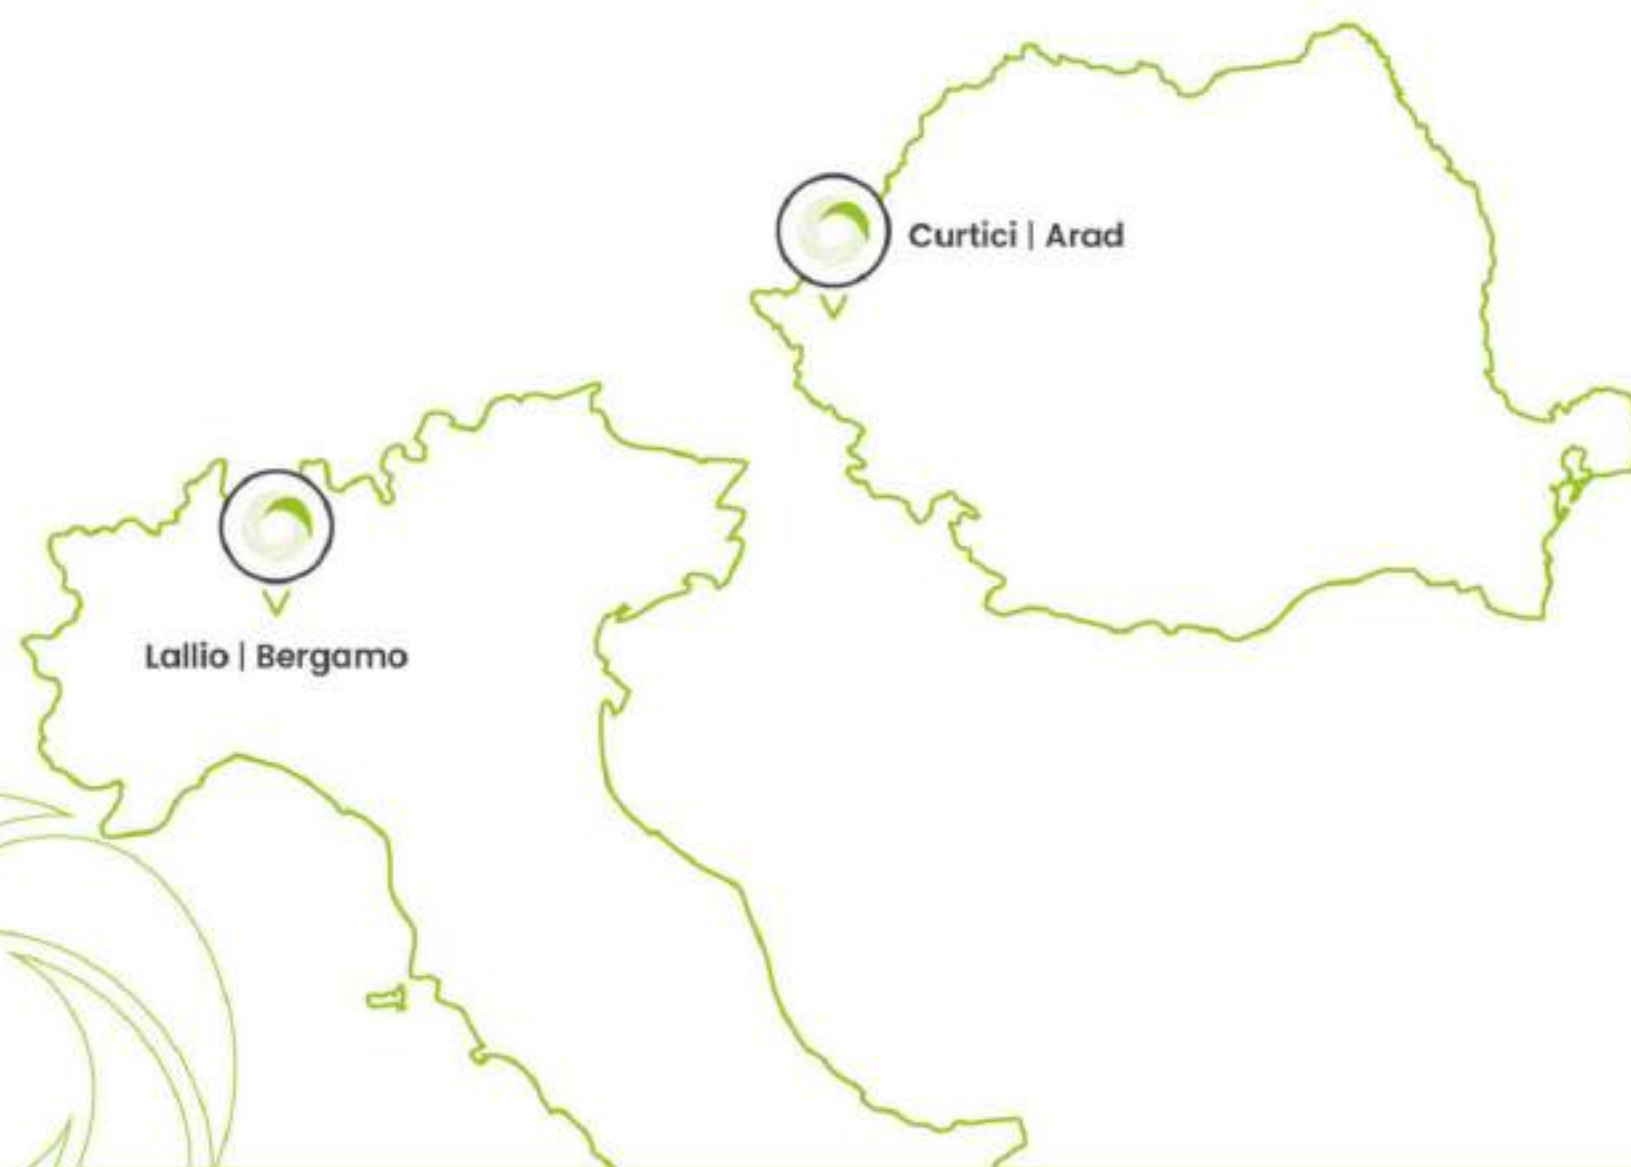

Listening to our customers, **working with partners** and engaging our employees are essential for NTS to be a solid and responsible entity in our community.

Step by step

Togther with our customers, we start a journey of **innovation**, working together step by step, from the initial stages of project definition to the final stages of industrialization. We are convinced that by prioritizing **Value** creation, we can achieve the highest standards of **Quality** in everything we do.

Our **Italian** plant in Lallio, in the province of Bergamo, covers a production area of 10.000 square meters. We are also present in **Romania**, with a production plant in Curtici-Arad, covering a production area of 3.000 square meters.

*There are no big things,
only a logical accumulation of little things
done at a very high standard
of performance.*

John Wooden

Plastic and Agile

Our experience has taught us that true innovation requires a **flexible mindset** combined with a **solid and effective work method**.

NTS's method is based on an **agile** approach, characterized by precise phases that are repeated in a loop according to project needs.

Through this method, NTS aims to improve flexibility and responsiveness, particularly in highly innovative production areas.

*Young people must believe in positive values
as they will persist after our death,
and life is only precious if we believe in values.*

Rita Levi Montalcini

Thanks to our values

Thanks to our values, **transparency and consistency** are fundamental in our relationships.

We are committed to communicate **professionally** with partners and customers, building trust.

Our values also embrace sustainability and **responsibility**, aiming to reduce energy consumption, use recycled materials and minimize our impact on the environment. Our actions today shape the sustainability of the future.

GLOBAL COMPACT ONU

We have been committed to the UN Global Compact since 2011. This strategic corporate initiative aims to create a sustainable global economy that respects human rights and is sensitive to social and environmental matters.

ECOVADIS

We are active members of the Ecovadis and Open-es platforms, which conduct annual sustainability performance assessments.

RISK MANAGEMENT

Corporate management is based on risk, according to a detailed risk matrix we're aligned and certified with the required standards of the regulations.

ANTI-CORRUPTION

To prevent conduct prohibited by anti-corruption laws, NTS S.p.A. has adopted a specific Anti-Corruption Policy.

CODE OF CONDUCT

The code of conduct is an essential part of NTS's organisational system, which is based on ethics, transparency, and legality. Compliance with this system is functional for operativeness and reliability of NTS, as well as for the protection of its prestige, image, and know-how.

QUALITY CERTIFICATIONS

Our corporate organisational system is fully compliant with ISO 9001:2015 and IATF 16949:2016 quality certifications.

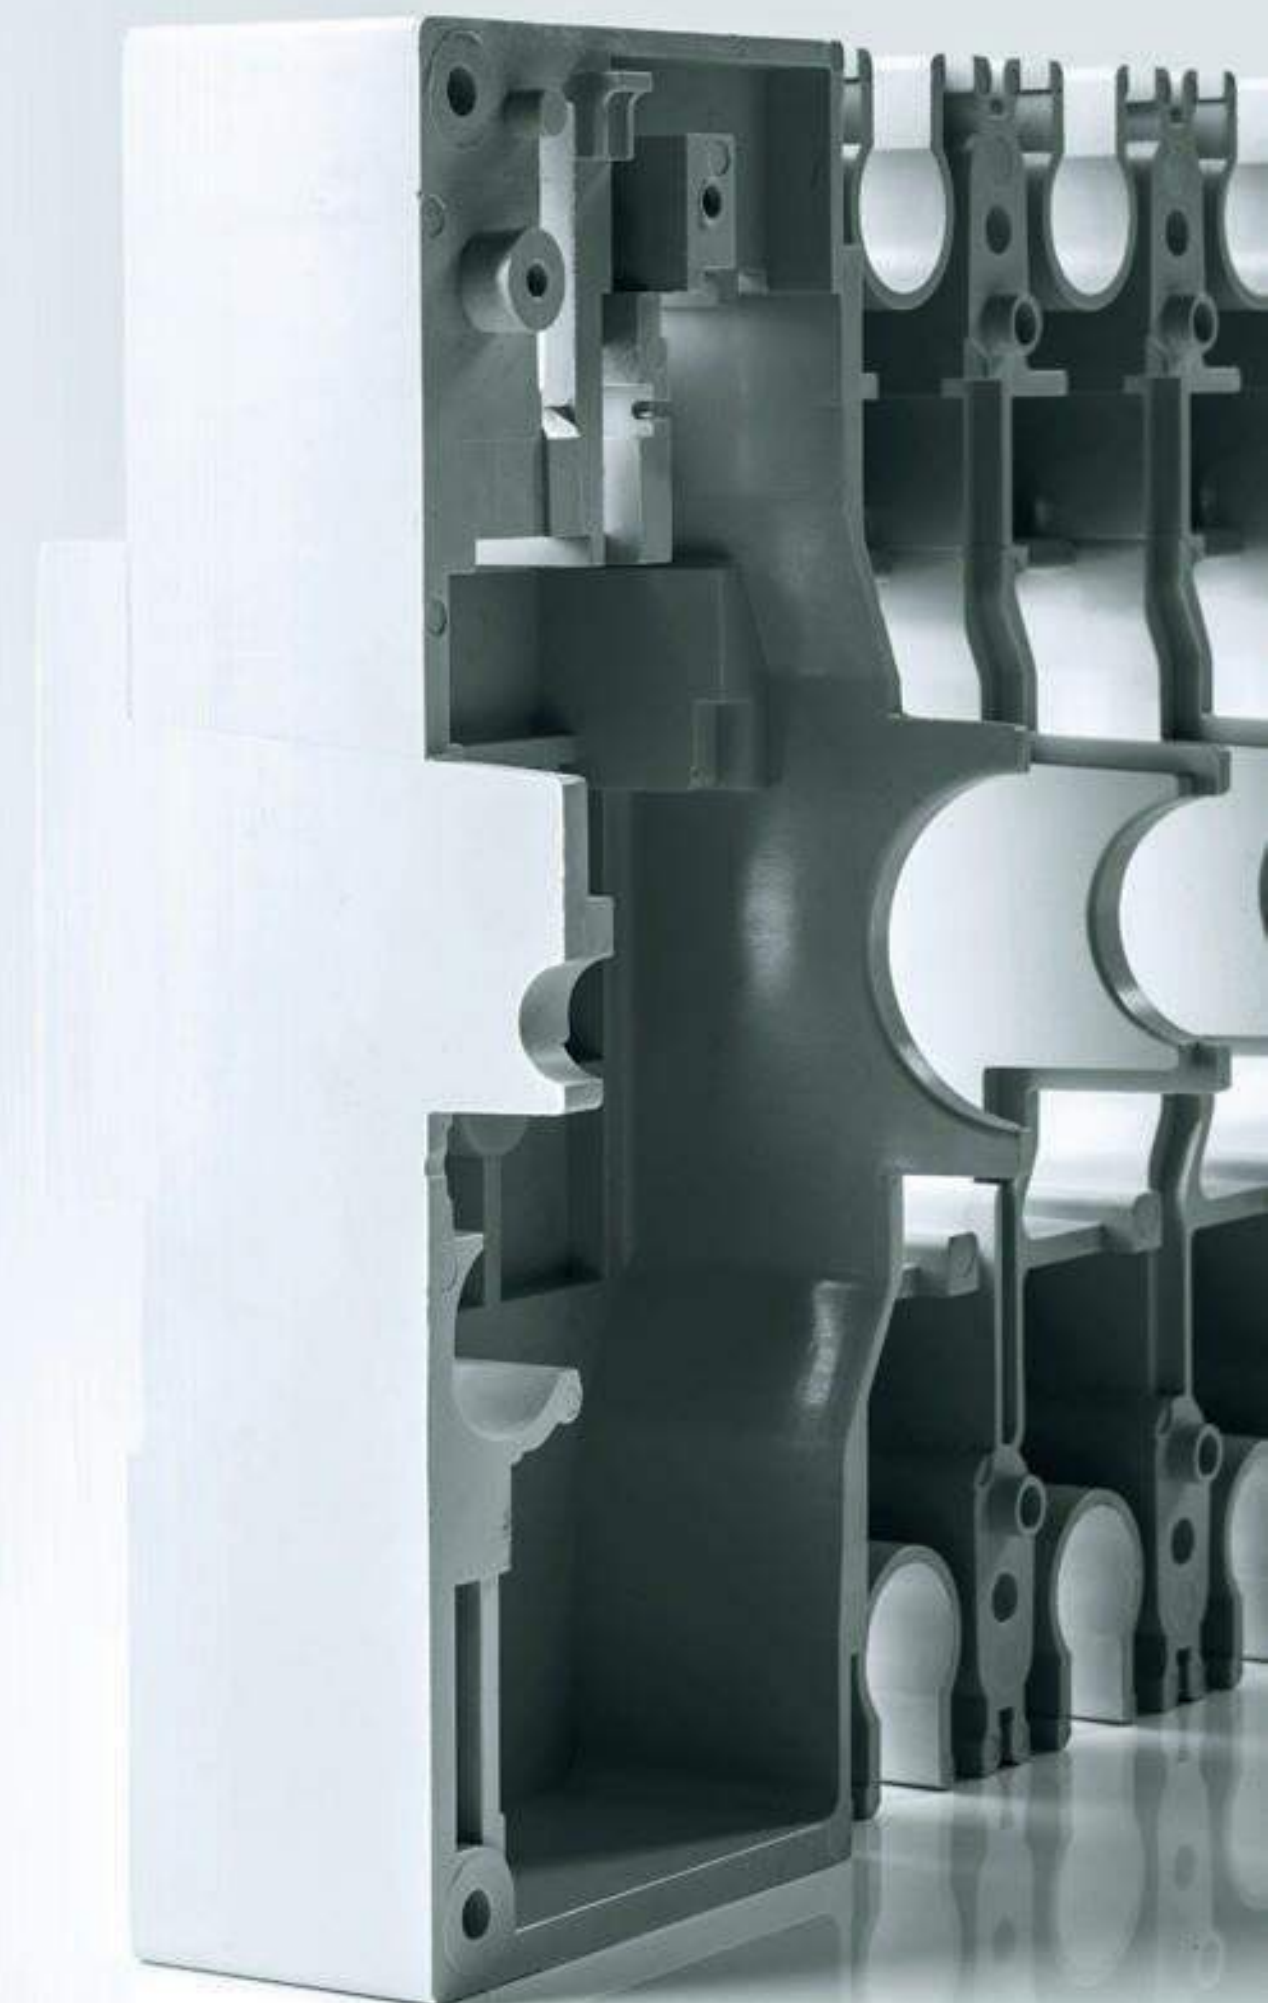

CONFLICT MINERAL

We endorse and promote the actions of the international programme that discourages the use of minerals whose trade could finance conflict or lead to human rights abuses.

THE NTS METHOD

Our philosophy is based on the fundamental concept of considering the Customer at the center of the entire production and sales process. The primary objective is to meet their specific needs and expectations.

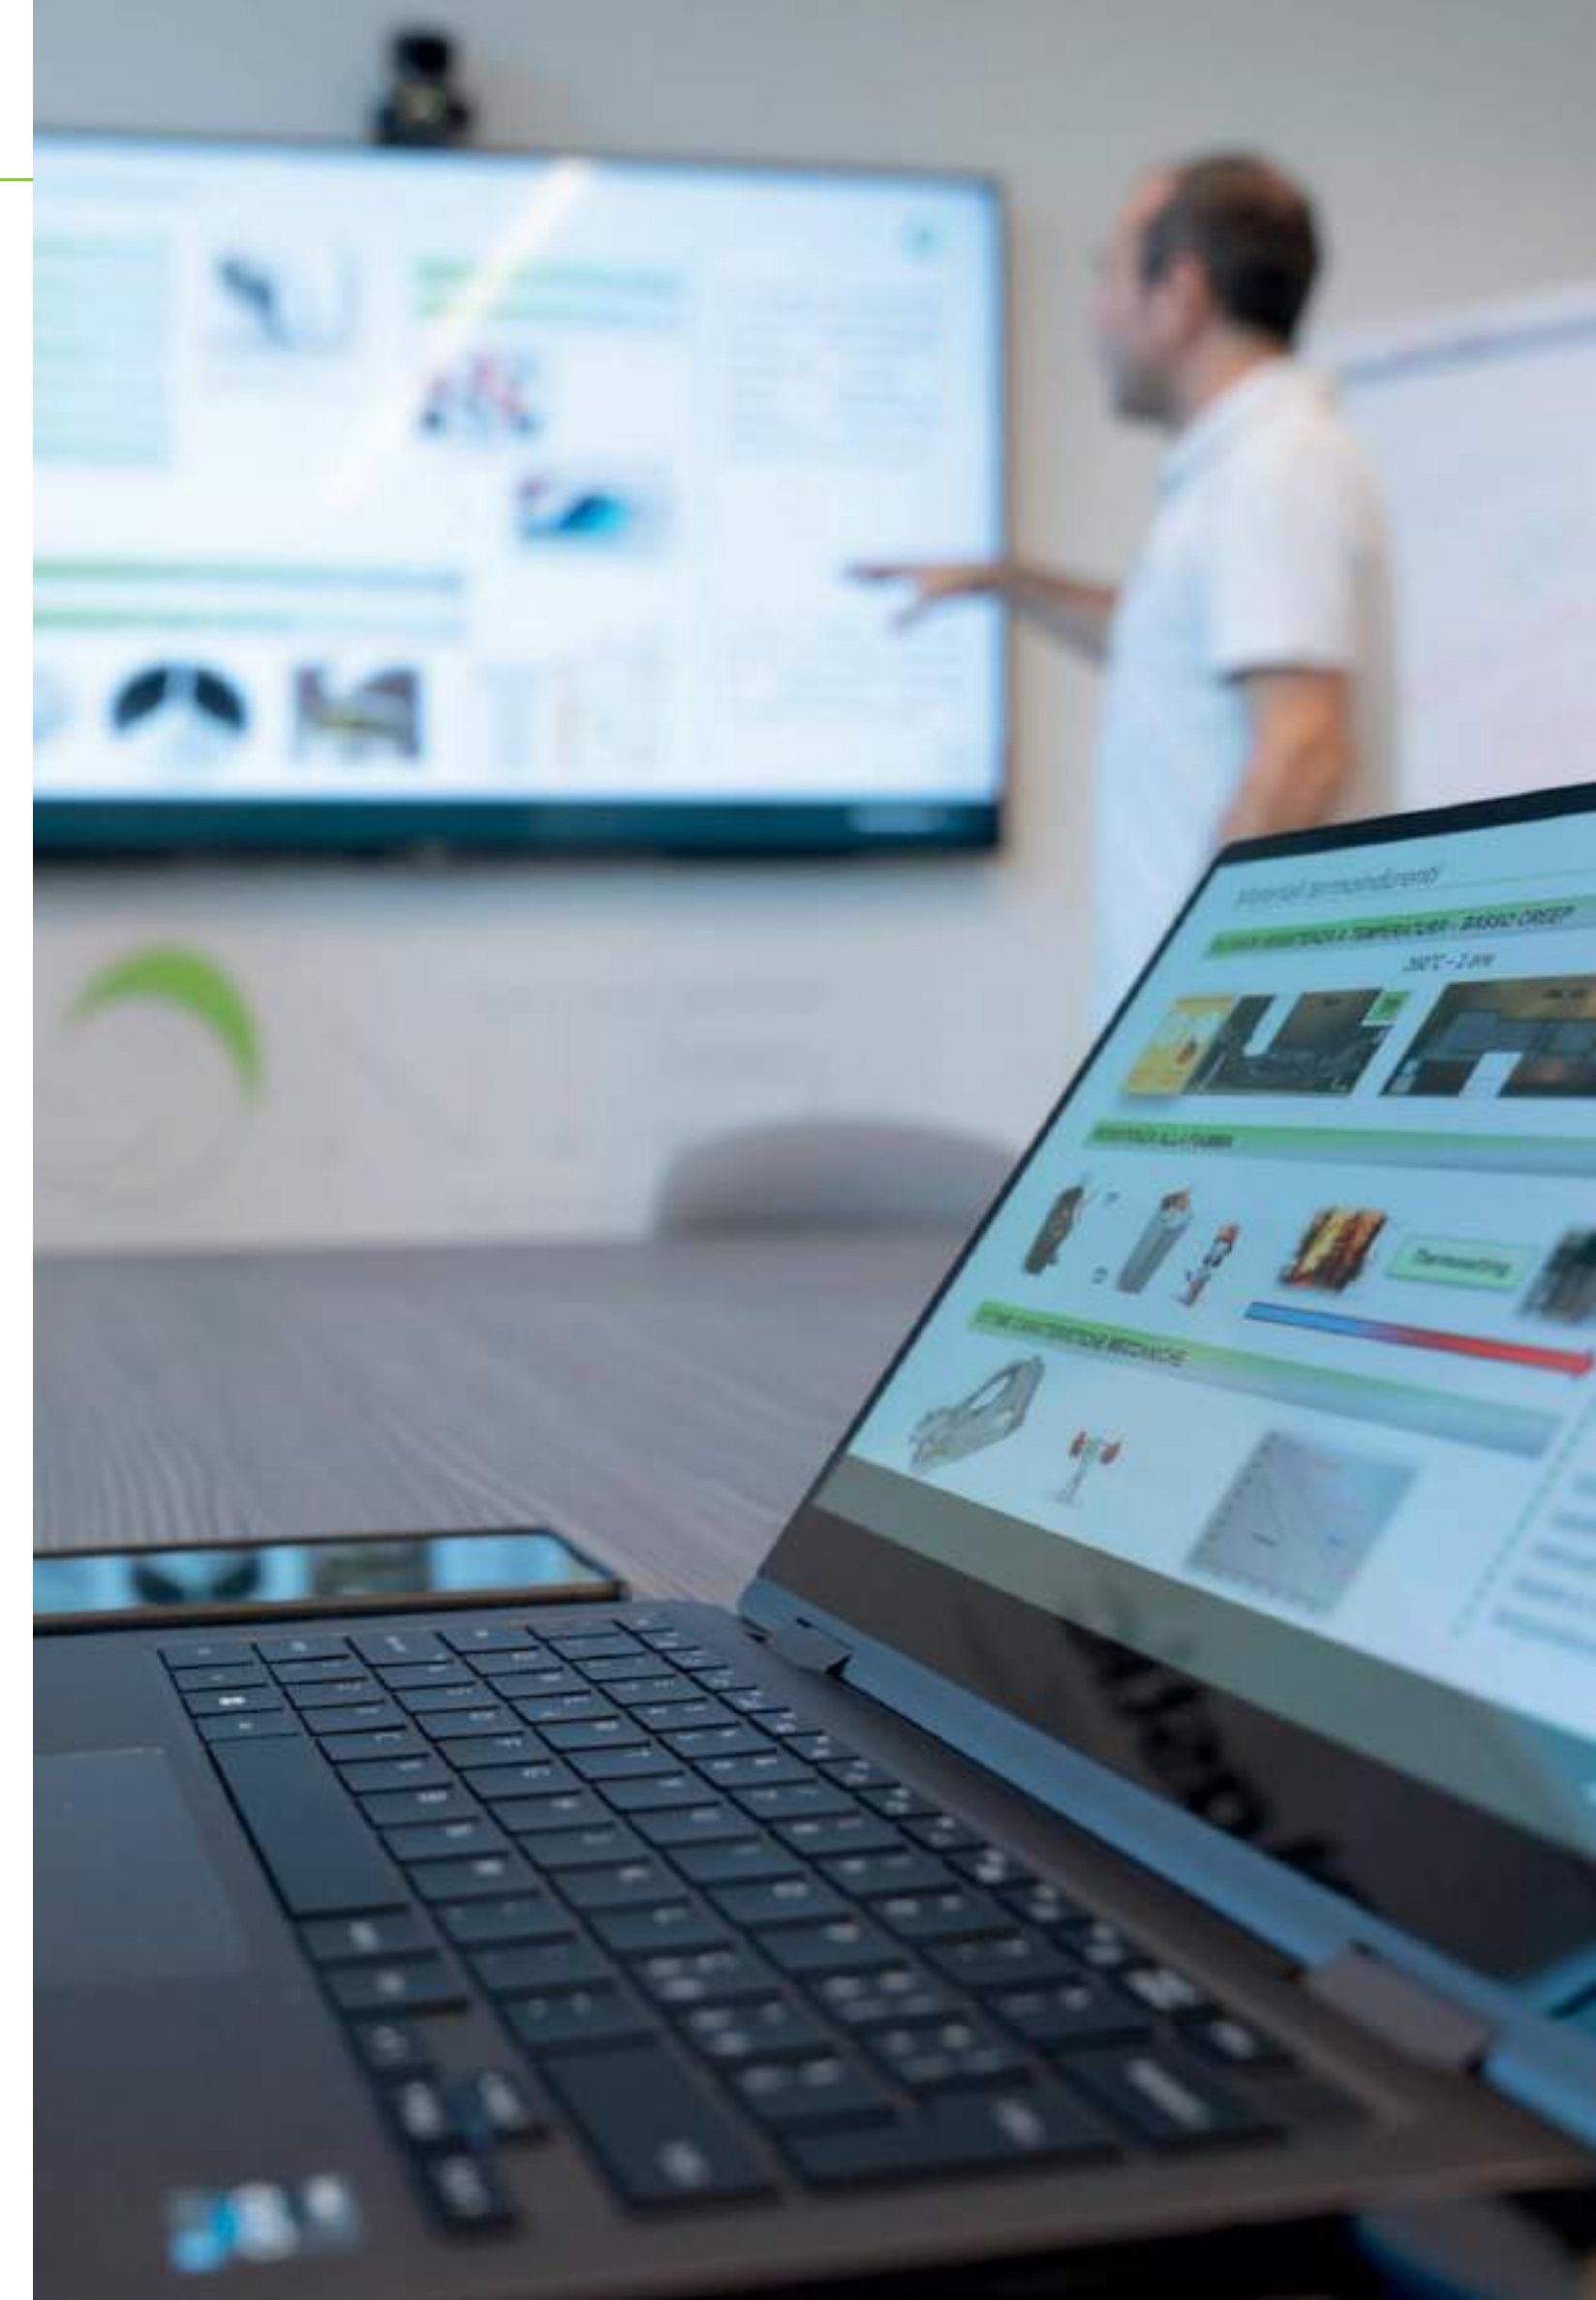

NTS ACADEMY SERVICE

The Academy shares technical and **scientific knowledge** to stimulate innovative ideas and solutions among our customers and within the company. In this way, we can meet the challenges of the most innovative projects, bridging the gap between customer needs, project goals and internal culture.

SOME OF OUR WORKSHOPS

-  Electric motors – NTS application technologies
-  Metal replacement
-  Design sprint production

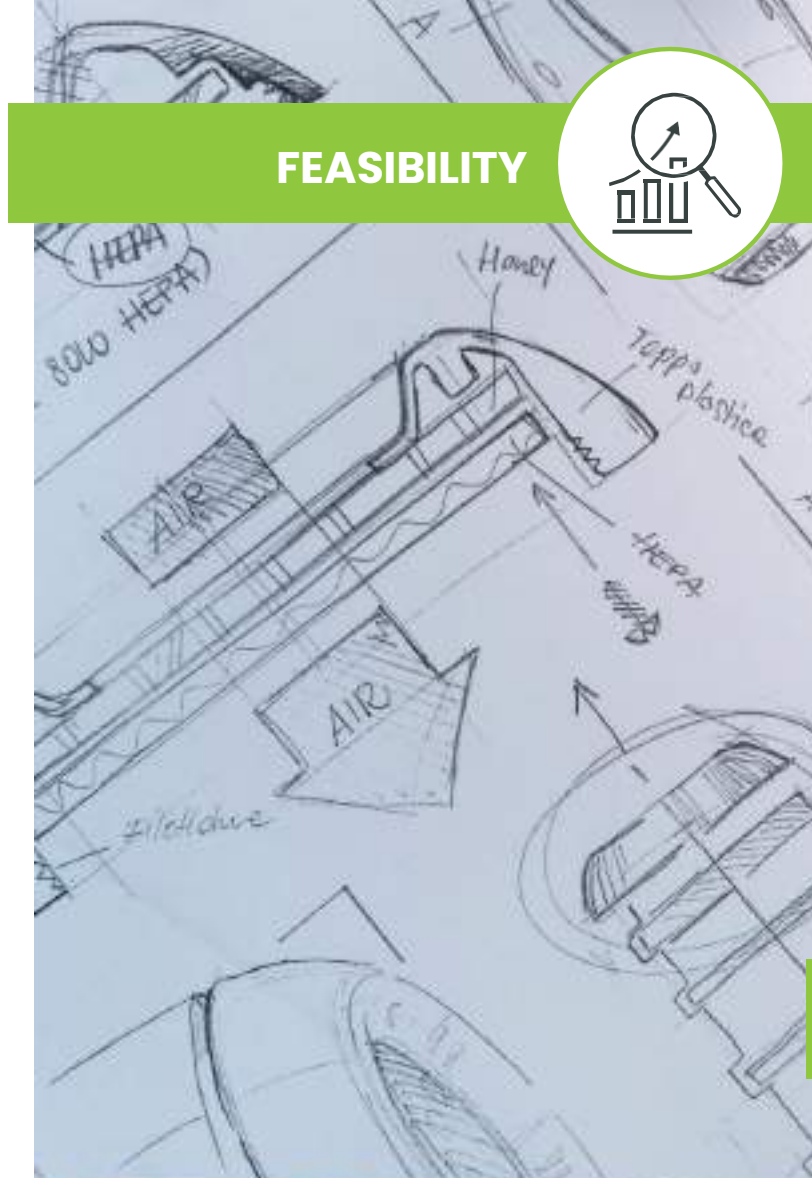

R&D INDUSTRIAL SOLUTION

NTS Tech is at the leading edge of industrial solutions, offering a complete journey from initial **feasibility study** to complete **serial production**.

Our R&D capabilities open the way for innovative projects, leveraging our extensive knowledge of plastic materials and molding technologies. This expertise ensures not only high quality results, but also on-time production to meet the demands of the everchanging market.

Through our focus on innovation and precision, we're committed to deliver solutions that **elevate industry standards** and meet customer expectations.

FEASIBILITY

PROTOTYPING

TOOLMAKING

MOULDING

INNOVATIVE MANUFACTURING

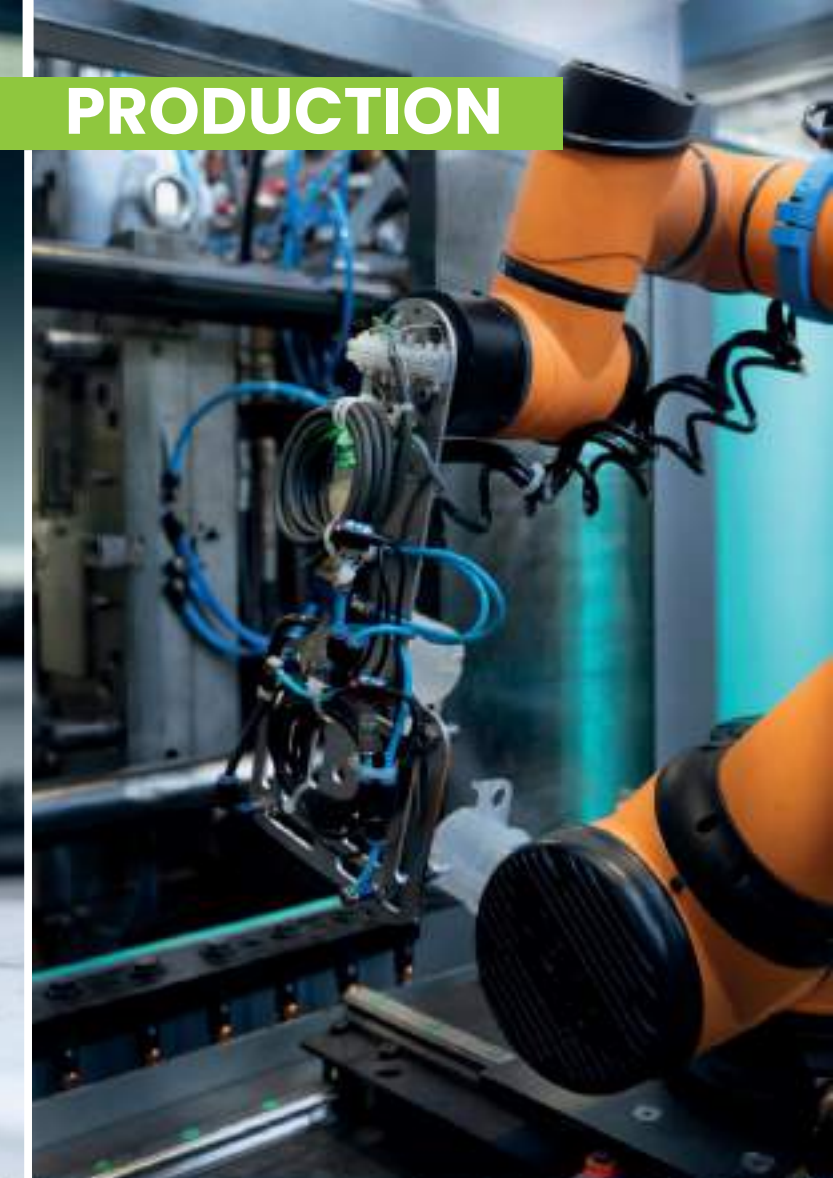

Our production department specializes in toolmaking and molding of components using the latest manufacturing technologies. With a strong focus on innovation and efficiency, we integrate a full range of finishing and assembly processes into our workflow.

From the initial design phase to the final product, we prioritize **precision** and quality at every step. By using **sustainable materials** and advanced robotics, we ensure not only reliable and accurate manufacturing, but also precise finishing and assembly.

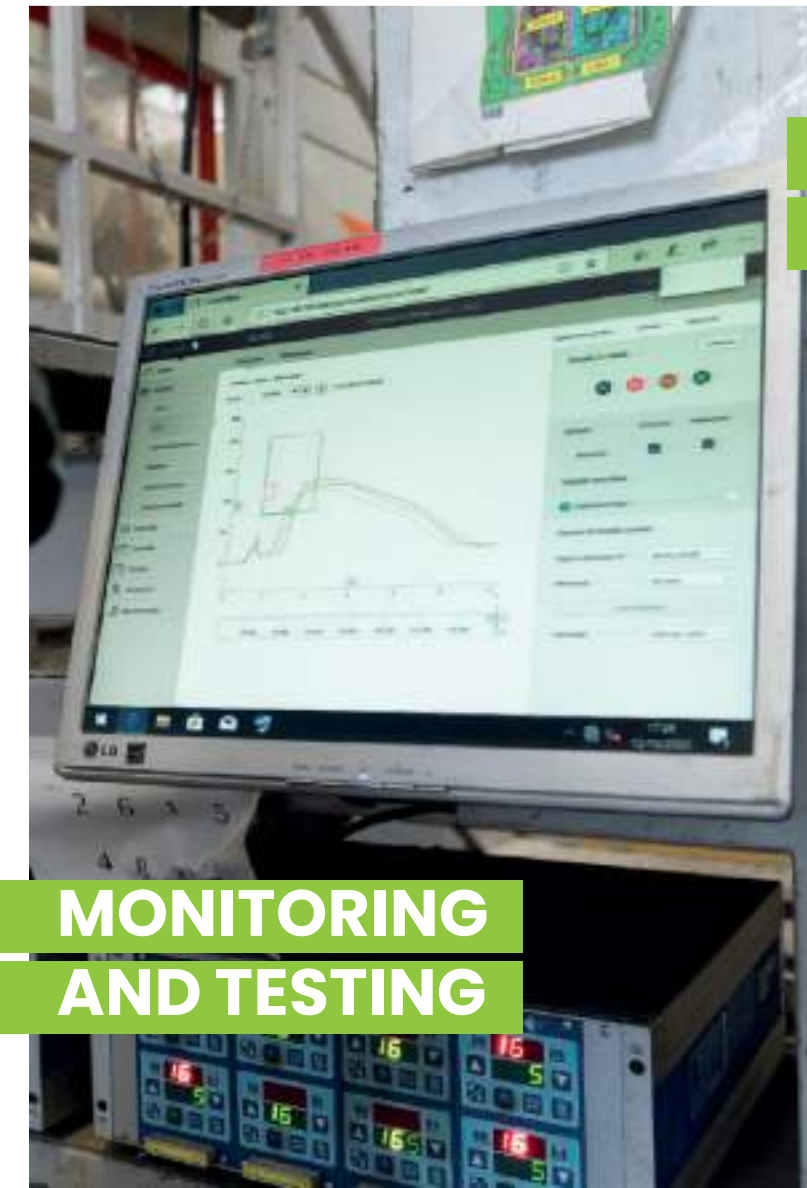

Our **quality control** measures ensure that each product meets the highest standards of excellence, delivering unique value to our customers.

MOLD MAINTENANCE SERVICE

NTS Maintenance division plays a crucial role in **customer care** by carefully monitoring mold status and providing regular maintenance services.

Our proactive interventions aim to **prevent faults** and **extend product lifespan**, ensuring optimal performance and customer satisfaction over time.

THE OPEN LABORATORY

NTS Lab is responsible for **product certification** and for **testing** and **measuring** our products to meet quality standards.

Thanks to collaboration with strategic technology partners, we offer integrated services and competencies for new products development and industrialization.

We Do Our Part

For more than **60 years**, our corporate values represent the roots that guides our actions and inspire **innovation, sustainability** and **ethical business practices**. We are engaged with our communities to address environmental challenges, promote **dignity** and **respect** in our work and ensuring business continuity for **future generations**.
